## Note for using existing save games from 0.1.3:

I made sure to keep all the save files created from 0.1.2 and upwards compatible.

The old saves should have no problems loading. For the selection of the new proficiencies, you'll get a prompt to select one.

**IMPORTANT!** It is possible that you get an error while loading, telling you that it couldn't load an image file. In that case, you can just click on ignore. You'll get a missing background in the proficiency selection but after that, everything should then work properly. Also if the school map looks a bit buggy after loading, that should fix itself after entering a location or opening the journal.

All that are just visual bugs, occur only directly after loading an old game and won't influence or corrupt the game itself.
